"Since time travelling became public and affordable, the chance of seeing K\_CHICO playing his guitar is constantly growing. Coming from the future he is telling stories of yesterday using technology of tomorrow.

Blues meets Electro and Western meets Disco. Inspired by John Lee Hooker, Depeche Mode and some guys not even born yet, this old man definitely found a sound of his own. Sometimes rough, dry and direct, sometimes warm and colorful. But its all held together by the only thing that's left to an old man - K\_CHICO sings the blues like you never heard it before.

If you are lucky enough to catch him playing live, you will hear the blues wrapped up into a massive sound that grabs you and makes you dance. Driving guitar riffs, powerful drums and huge bass lines."
